PROGRAMMING 2B (PROG6212)

Part 1

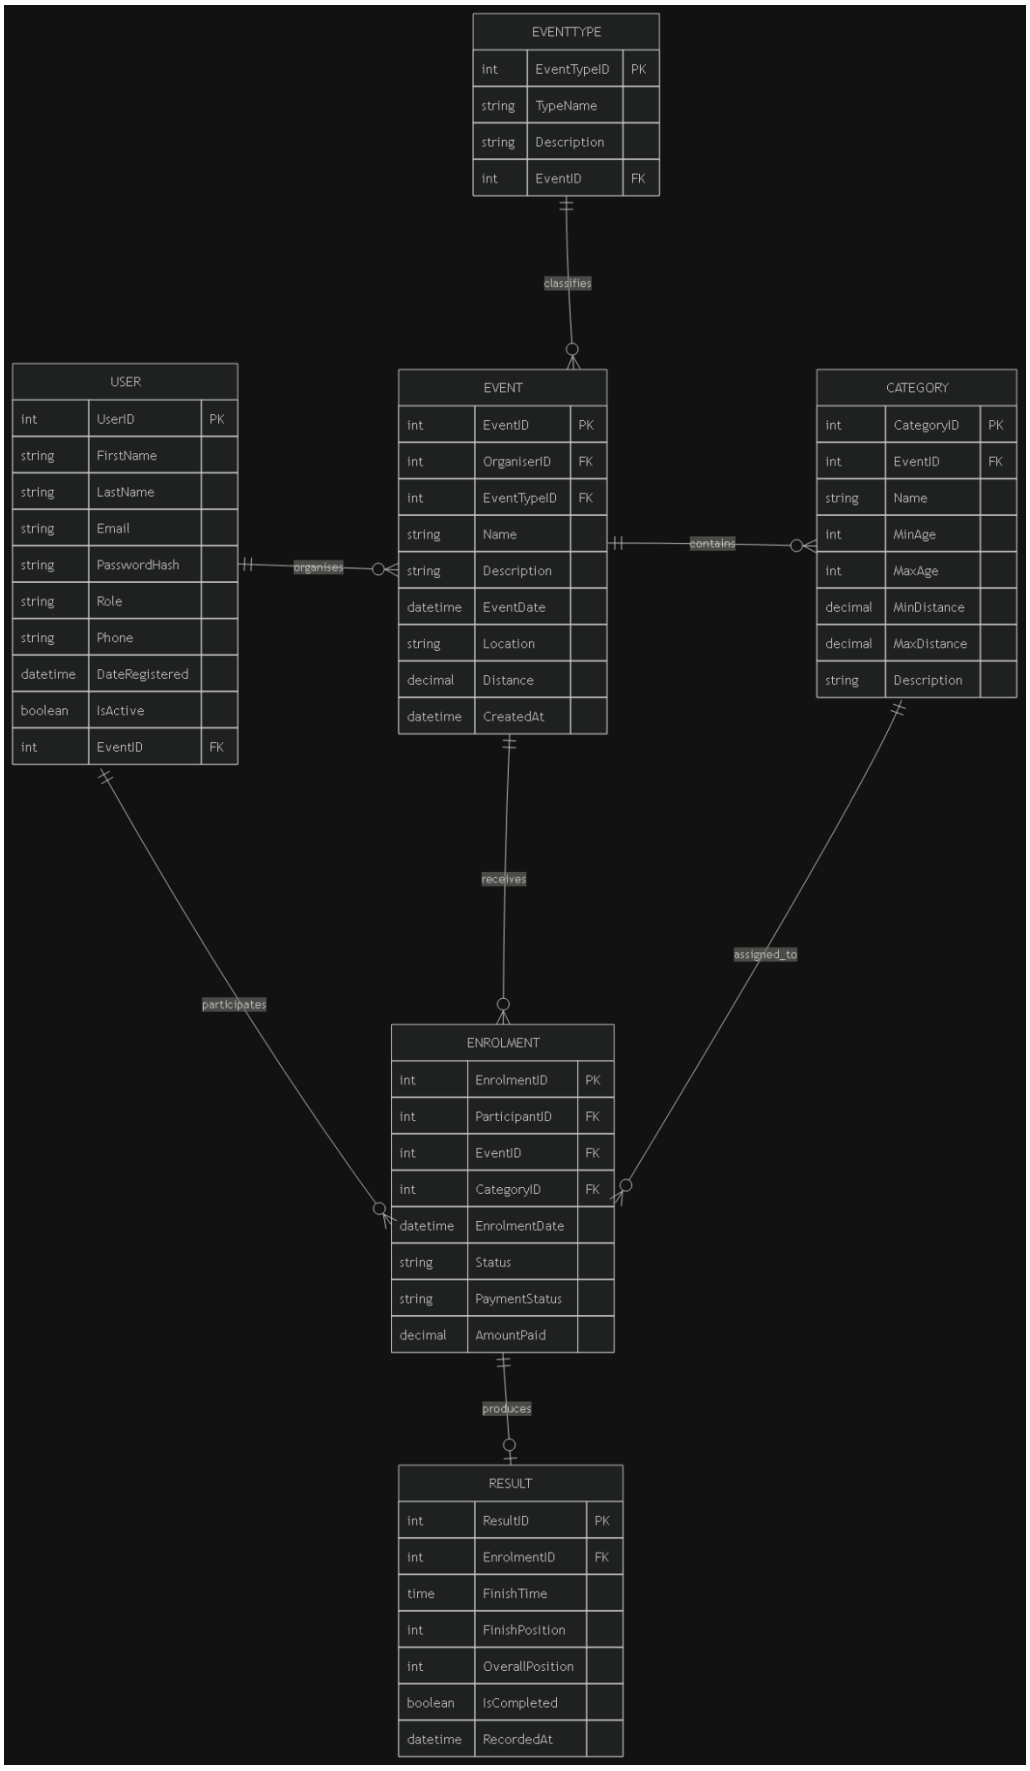
OTLOTLENG MABILETSA ST10478180

Contents

Section A — ERD

Entity	Description
Users	Stores each user account and links the user to a role such as Organiser or Participant.
Roles	Lookup table for the two system roles: Organiser and Participant.
Events	Stores event information including name, description, date, location, distance and event type.
Categories	Stores age-based or distance-based categories used for event participation.
EventCategories	Junction table connecting Events and Categories in a many-to-many relationship.
Enrolments	Records Participants entering Events and selecting a Category.
Results	Stores a Participant result after an event, including finish time and finishing position.

ERD Screenshot



Relationship and Cardinality

Relationship	Cardinality	Explanation
Users → Roles	Many-to-One	Each user has one role; one role can belong to many users.
Roles → Users	One-to-Many	A role can be assigned to many user accounts.
Users → Enrolments	One-to-Many	A Participant can have many enrolments; each enrolment belongs to one participant.
Users → Events	One-to-Many	An Organiser can create many events; each event belongs to one Organiser.
Events → Enrolments	One-to-Many	One event can have many enrolments; each enrolment belongs to one event.
Events → EventCategories	One-to-Many	One event can be linked to many categories through EventCategories.
Categories → EventCategories	One-to-Many	One category can be linked to many events through EventCategories.
Enrolments → Results	One-to-One	Each enrolment can have zero or one result; each result belongs to one enrolment.
Enrolments → Categories	Many-to-One	Each enrolment selects one category; a category may be used by many enrolments.

. Primary and Foreign Keys

Entity	Primary Key	Foreign Key(s)
Users	UserId	RoleId → Roles.RoleId
Roles	RoleId	—
Events	EventId	OrganiserId → Users.UserId
Categories	CategoryId	—
EventCategories	EventCategoryId	EventId → Events.EventId; CategoryId → Categories.CategoryId
Enrolments	EnrolmentId	ParticipantId → Users.UserId; EventId → Events.EventId; CategoryId → Categories.CategoryId
Results	ResultId	EnrolmentId → Enrolments.EnrolmentId

Section B — API Endpoint Plan

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
POST	/api/auth/register	Register a new user account with role selection (Organiser or Participant).	None (Public)	{ email, password, firstName, lastName, role }	201 Created — userId, email, role; 400 Bad Request — validation error; 409 Conflict — email exists
POST	/api/auth/login	Authenticate a user and establish a session.	None (Public)	{ email, password }	200 OK — userId, email, role, firstName, lastName; 401 Unauthorized — invalid credentials
GET	/api/users/profile	Get the currently authenticated user profile.	Any (Logged in)	None	200 OK — user profile; 401 Unauthorized — not authenticated
PUT	/api/users/profile	Update the authenticated user profile.	Any (Logged in)	{ firstName, lastName, email }	200 OK — updated profile; 400 Bad Request — validation error; 401 Unauthorized
POST	/api/users/profile/picture	Upload a profile picture for the authenticated user.	Any (Logged in)	Multipart form data: { profilePicture }	200 OK — profilePictureUrl; 400 Bad Request — invalid file; 401 Unauthorized
GET	/api/events	Get all events with optional filters.	Any (Logged in)	None; query params: type, dateFrom, dateTo	200 OK — array of events; 401 Unauthorized
GET	/api/events/{id}	Get a specific event by ID including categories.	Any (Logged in)	None	200 OK — event object; 404 Not Found; 401 Unauthorized
POST	/api/events	Create a new event.	Organiser	{ name, description, eventDate, location, distance, eventType, bannerImage? }	201 Created; 400 Bad Request; 401 Unauthorized; 403 Forbidden
PUT	/api/events/{id}	Update an existing event.	Organiser	{ name, description, eventDate, location, distance, eventType, bannerImage? }	200 OK; 400 Bad Request; 401 Unauthorized; 403 Forbidden — not owner; 404 Not Found

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
DELETE	/api/events/{id}	Delete an event.	Organiser	None	204 No Content; 401 Unauthorized; 403 Forbidden — not owner; 404 Not Found
POST	/api/events/{id}/banner	Upload an event banner image.	Organiser	Multipart form data: { bannerImage }	200 OK — bannerImageUrl; 400 Bad Request; 401 Unauthorized; 403 Forbidden
GET	/api/categories	Get all categories.	Any (Logged in)	None	200 OK — array of categories; 401 Unauthorized
GET	/api/categories/{id}	Get a specific category by ID.	Any (Logged in)	None	200 OK — category; 404 Not Found; 401 Unauthorized
POST	/api/categories	Create a new category.	Organiser	{ name, description, categoryType }	201 Created; 400 Bad Request; 401 Unauthorized; 403 Forbidden
PUT	/api/categories/{id}	Update an existing category.	Organiser	{ name, description, categoryType }	200 OK; 400 Bad Request; 401 Unauthorized; 403 Forbidden; 404 Not Found
DELETE	/api/categories/{id}	Delete a category.	Organiser	None	204 No Content; 401 Unauthorized; 403 Forbidden; 404 Not Found
POST	/api/events/{eventId}/categories/{categoryId}	Add a category to an event.	Organiser	None	201 Created; 401 Unauthorized; 403 Forbidden — not owner; 404 Not Found
DELETE	/api/events/{eventId}/categories/{categoryId}	Remove a category from an event.	Organiser	None	204 No Content; 401 Unauthorized; 403 Forbidden — not owner; 404 Not Found
GET	/api/enrolments	Get the authenticated participant enrolments or organiser event enrolments.	Any (Logged in)	None	200 OK — array of enrolments; 401 Unauthorized
GET	/api/enrolments/{id}	Get a specific enrolment.	Any (Logged in)	None	200 OK; 404 Not Found; 401 Unauthorized; 403 Forbidden
POST	/api/enrolments	Enrol a Participant in an event with a selected category.	Participant	{ eventId, categoryId }	201 Created; 400 Bad Request — validation/already enrolled; 401 Unauthorized; 403 Forbidden; 404 Not Found

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
PUT	/api/enrolments/{id}/status	Update an enrolment status for an Organiser.	Organiser	{ status }	200 OK; 400 Bad Request — invalid status; 401 Unauthorized; 403 Forbidden; 404 Not Found
GET	/api/events/{eventId}/enrolments	Get all enrolments for a specific event.	Organiser	None	200 OK — enrolments with participant details; 401 Unauthorized; 403 Forbidden; 404 Not Found
GET	/api/results/my	Get all results for the authenticated Participant.	Participant	None	200 OK — result array with event details; 401 Unauthorized; 403 Forbidden
GET	/api/events/{eventId}/results	Get all results for a specific event.	Any (Logged in)	None	200 OK — result array; 401 Unauthorized; 404 Not Found
POST	/api/results	Capture a result for an enrolled Participant.	Organiser	{ enrolmentId, finishTime, finishingPosition }	201 Created; 400 Bad Request — validation/already exists; 401 Unauthorized; 403 Forbidden; 404 Not Found
PUT	/api/results/{id}	Update an existing result.	Organiser	{ finishTime, finishingPosition }	200 OK; 400 Bad Request; 401 Unauthorized; 403 Forbidden; 404 Not Found
DELETE	/api/results/{id}	Delete a result.	Organiser	None	204 No Content; 401 Unauthorized; 403 Forbidden; 404 Not Found
